

ARHAN KHAN

Software Developer & Digital Operations | Project & Operations Manager

Stuttgart, 70569, Germany | +49 176 6685 2627 | arhan.khan.careerdemands@gmail.com | [linkedin.com/in/arhan-khan](https://www.linkedin.com/in/arhan-khan)

PROFILE

Student of Digital Technology & Management (B.Sc.) who independently designs, builds, and ships production-ready software — using Django, Python, JavaScript, REST APIs, and Claude API integrations — while simultaneously owning real operational work in CRM data management, sales pipelines, SEO, and structured reporting. Currently leads five live, self-built SaaS platforms in production use at ReRent, and previously founded and grew a study-abroad guidance company to €8,000+ in first-year revenue. Structured, detail-oriented, and comfortable working end-to-end from requirements through deployment.

PROFESSIONAL EXPERIENCE

Project & Operations Manager — ReRent GbR, Stuttgart, Germany Apr 2026 – Present

- Own end-to-end delivery of internal software tools, from requirements gathering through technical build to production rollout, coordinating closely with development and DevOps.
- Led the design and deployment of five custom SaaS platforms now in production use: a QA management platform, an AI content generator, a task/hours tracker, a custom CRM, and an AI-powered lead generation engine.
- Manage the sales pipeline (leads, client interactions, deal status) across internal tracking systems, ensuring data accuracy at every stage.
- Own SEO and inbound marketing strategy; oversee the social media team (Instagram, LinkedIn) and track results via custom Excel dashboards.

Founder & Digital Operations Manager — Studio Abroad, India (Remote) Nov 2025 – Mar 2026

- Founded and built Studio Abroad end-to-end — website, social channels, and Meta Ads — helping international students with university applications, entrance exam preparation, and study-abroad guidance.
- Generated €8,000+ in revenue within the first year of operation.
- Coordinated global student recruitment operations and maintained CRM data integrity for 100+ active leads.
- Planned and executed multi-channel marketing campaigns (Instagram, Facebook, LinkedIn) with structured KPI reporting in Excel.
- Wrote SOPs and process documentation that reduced onboarding time for new team members.

Werkstudent — Data Entry & Quality Assurance — Hugo Boss, Germany Aug 2025 – Sep 2025

- Recorded and maintained product and customer data in ERP/internal systems to rigorous accuracy standards.
- Performed systematic data verification, cleansing, and deduplication to eliminate cross-dataset inconsistencies.

Web Designer & Social Media Manager — Elite Vision GmbH, Germany May 2025 – Jul 2025

- Managed project documentation, client data records, and digital marketing deliverables with consistent MS Office discipline.
- Tracked social media engagement metrics and iterated the content calendar weekly based on performance data.

FEATURED PROJECTS

ReRent Bug Tracker & QA Management Platform — Django 6.0, Python 3.14, JavaScript (AJAX), SQLite

Full-stack QA platform replacing WhatsApp threads and scattered Google Docs with a single structured system for two live websites — automatic developer notification on assignment, end-to-end fix tracking, and real-time owner view. Designed, built, and deployed solo; in active production.

ReRent Blog Studio — Django 6.0, Python 3.14, Claude API, SQLite

AI-integrated content operations platform replacing a fragmented spreadsheet-and-folder workflow: Claude-powered drafting, automated SEO infrastructure, and a self-correcting scheduling engine. Cut a 10-hour weekly content workflow to about 60 minutes. Architected and built solo in 8 weeks.

ReRent Time Tracker & Task Management Platform — Django 6.0, Python 3.14, JavaScript (AJAX), SQLite

Workforce operations platform replacing WhatsApp check-ins and Excel timesheets — employees log hours against tasks, admins set and lock weekly targets, and every logged hour is cross-checked before it counts toward salary, with leave management and real-time messaging built in. Designed, built, and deployed solo; in active production.

ReRent CRM — AI-Ready B2B Sales & Outreach Platform — Django 6.0, Python 3.14, Claude API, SQLite

Full-stack B2B CRM running an entire cold-outreach operation — company/contact data, cold calling, email sequences, pipeline, and reporting — in one system, featuring a smart import engine that auto-detects and de-duplicates data from any spreadsheet, plus an AI

Composer plugged directly into Claude for on-demand email generation. Currently manages 6,300+ B2B accounts and 4,000+ contacts in production.

AI-Powered Lead Generation & Automation Engine — *Python, Web Scraping, Linux/VPS Cluster, OpenAI API*

Distributed data pipeline mapping every relevant business across all 16 German federal states, using Python scrapers running in parallel across a self-managed cluster of Linux VPS servers, feeding an AI enrichment stage that verifies each lead and extracts contact details from Germany's legally required Impressum page. Compressed an estimated 10–12 months of manual research into 1.2 months, at zero data-acquisition cost. Designed, built, and deployed solo.

Studio Abroad (Founder) — *Web Design, Meta Ads, Social Media, Lead Funnels*

Founded and built this study-abroad guidance company from scratch, including website, social channels, and Meta Ads, helping international students land offers. Grew it to €8,000+ revenue in the first year.

EDUCATION

B.Sc. Digital Technology & Management — Hochschule der Medien, Germany (2025 – 2028, in progress)

Diploma in Informatik — R.V. University, Bengaluru, India (2023 – 2025, completed)

Advanced Diploma in Computer Applications — Swami Vivekanand Institute, Mumbai, India (2021 – 2022, completed)

SKILLS & TOOLS

Programming: Python, JavaScript, HTML/CSS, C/C++ (basics)

Frameworks & Infrastructure: Django, REST APIs, SQLite, Git, Claude API, OpenAI API, Linux/VPS, WordPress, VS Code

Data & Operations: MS Excel (Advanced), CRM Workflows, SharePoint, SEO/Analytics, Google Workspace

Core Competencies: Data Quality, Independent Initiative, Detail-Oriented, SaaS Product Building, Cross-Functional Coordination, Documentation
