Software Developer & Digital Operations | Project & Operations Manager

5 self-built SaaS platforms in production · €8,000+ revenue founded & generated · B.Sc. Digital Technology & Management

PROFILE

Student of Digital Technology & Management (B.Sc.) who independently designs, builds, and ships production-ready software, using Django, Python, JavaScript, REST APIs, and Claude API integrations, while simultaneously owning real operational work in CRM data management, sales pipelines, SEO, and structured reporting. Currently leads five live, self-built SaaS platforms in production use at ReRent, and previously founded and grew a study-abroad guidance company to €8,000+ in first-year revenue. Structured, detail-oriented, and comfortable working end-to-end from requirements through deployment. Languages: English (C2), German (B1).

PROFESSIONAL EXPERIENCE

Project & Operations Manager
Apr 2026 – Present

ReRent GbR · Stuttgart, Germany

- Own end-to-end delivery of internal software tools — from requirements gathering through technical build to production rollout — coordinating closely with development and DevOps.
- Led the design and deployment of five custom SaaS platforms now in production use: a QA management platform, an AI content generator, a task/hours tracker, a custom CRM, and an AI-powered lead generation engine.
- Manage the sales pipeline (leads, client interactions, deal status) across internal tracking systems, ensuring data accuracy at every stage.
- Own SEO and inbound marketing strategy; oversee the social media team (Instagram, LinkedIn) and track results via custom Excel dashboards.

Founder & Digital Operations Manager
Nov 2025 – Mar 2026

Studio Abroad · India (Remote)

- Founded and built Studio Abroad end-to-end — website, social channels, and Meta Ads — helping international students with university applications, entrance exam preparation, and study-abroad guidance.
- Generated €8,000+ in revenue within the first year of operation.
- Coordinated global student recruitment operations and maintained CRM data integrity for 100+ active leads.
- Planned and executed multi-channel marketing campaigns (Instagram, Facebook, LinkedIn) with structured KPI reporting in Excel.
- Wrote SOPs and process documentation that reduced onboarding time for new team members.

Werkstudent — Data Entry & Quality Assurance
Aug 2025 – Sep 2025

Hugo Boss · Germany

- Recorded and maintained product and customer data in ERP/internal systems to rigorous accuracy standards.
- Performed systematic data verification, cleansing, and deduplication to eliminate cross-dataset inconsistencies.

Web Designer & Social Media Manager
May 2025 – Jul 2025

Elite Vision GmbH · Germany

- Managed project documentation, client data records, and digital marketing deliverables with consistent MS Office discipline.
- Tracked social media engagement metrics and iterated the content calendar weekly based on performance data.

FEATURED PROJECTS

BMW DMC AI Verifier HACKATHON

FastAPI · Python · TypeScript · SQLite · Computer Vision · Automated Testing

Team hackathon project building a scanning and validation tool for BMW's GS91010-2 Data Matrix Code part-marking standard. Owned the rule validation engine covering 26 real GS91010-2 layouts, a self-healing auto-correction engine that detects and proposes fixes for codes damaged by up to ~30%, and camera-scanning reliability improvements including automatic symbol localization and an ISO 29158-style defect visualization. Verified with 160+ backend and 50+ frontend automated tests.

ReRent Bug Tracker & QA Management Platform

`Django 6.0 · Python 3.14 · JavaScript (AJAX) · SQLite`

Full-stack QA platform replacing WhatsApp/Google Docs bug tracking for two live websites — auto-notified developer assignment, cross-check sign-off workflow, real-time team chat.

ReRent Blog Studio

`Django 6.0 · Python 3.14 · Claude API · SQLite`

AI-integrated content operations platform — Claude-powered drafting, SEO infrastructure, self-correcting scheduling. Cut a 10-hour weekly workflow to 60 minutes.

ReRent Time Tracker & Task Management Platform

`Django 6.0 · Python 3.14 · JavaScript (AJAX) · SQLite`

Workforce operations platform — hours logging, admin-locked weekly targets with overtime detection, cross-checked payroll, task/project management, leave requests.

ReRent CRM — AI-Ready B2B Sales & Outreach Platform

`Django 6.0 · Python 3.14 · Claude API · SQLite`

B2B CRM managing 6,300+ companies and 4,000+ contacts — smart import/dedup engine, cold-calling workspace, weighted pipeline forecasting, AI email composer.

AI-Powered Lead Generation & Automation Engine

`Python · Web Scraping · Linux / VPS Cluster · OpenAI API`

Distributed scraping pipeline mapping every relevant business across all 16 German states — AI classification and legally-compliant (Impressum) contact extraction. Compressed ~10–12 months of manual research into 1.2 months.

Studio Abroad — Founder

`Web Design · Meta Ads · Social Media`

Founded and built this study-abroad guidance company from scratch. €8,000+ revenue in year one.

EDUCATION
